

This addendum provides the following:

- Answer to question submitted by plan holders

1. Question: A question was raised regarding the completion date of the project. The invitation to bid indicates a December 13, 2024 completion date while the NOTICE TO BIDDER – ROAD CLOSURE AND DETOUR indicates the road must be open to traffic at the start of school (tentatively August 26th)

Answer: The project must be completed in its entirety by December 13, 2024. The contractor may close the road for 40 days starting any time after the end of school (tentatively June 19, 2024) in order to remove the existing culvert, install the new structure and bring the road back to a safe passible condition. The requirement to have the road back open to traffic for the start of school (tentatively August 26th) has been removed. The 40 day closure may occur beyond this date, but the road may only be closed for 40 consecutive days. A minimum of one way alternating traffic must be maintained outside the 40 day closure.
